### Create

A project together. It starts with a conversation. Some wonder. Some wander. Some ponder. Some trust that what we give our attention to grows. Some big ideas. Some beginning steps.

Email me.

Humans everywhere wish connection in four simultaneous realms.

### Connected

Most often in my work with groups we need a meta story. It's the big story so that we can hold all of the smaller stories too.

Most often, that meta story for me is connection. Connection first. So that we can be in good learning together. Connection and learning, so that we can be in good experiments together. Oh ya, and joy too. And beauty.

The above diagram nuances some of those connection realms. It's gold when attention and awareness is given to each – connection with others, with circumstance, with ourselves, and with life flowing.

Connection is not only a thing to do, it is a way to be.

I love baking this into the groups I'm with. Lately in a corporate leadership development program, with two university leadership programs, with a faith community cohort program, and with an education association changing health paradigms.

Such fun to play. Let's!
